Preface	vii
Abbreviations	ix
Chapter 1. The Minimum You Need to Know About Stochastic Processes	1
1.1. Operations on random variables	1
1.2. Stochastic processes	4
1.2.1. Summary of second-order statistics of stochastic processes	6
1.2.2. Stationary (strict sense) stochastic processes	8
1.2.3. Mean-stationary stochastic processes	8
1.2.4. Wide-sense stationary (WSS) stochastic processes	9
1.2.5. Stochastic processes with independent, stationary increments	10
1.3. Specificities of second-order stochastic processes	11
1.3.1. Convergence in quadratic mean (qm) sense	11
1.3.2. Continuity (qm) for a stochastic process	12
1.3.3. Derivability (qm) for a stochastic process	12
1.3.4. Stochastic integration	13
1.4. White noise stochastic process model	15
1.4.1. White noise model (discrete-time)	15
1.4.2. White noise model (continuous time)	16
1.4.3. Example: uniform white noise	16
Chapter 2. Stochastic Discrete Domain Convolution Integration Models	19
2.1. Motivation	19
2.2. Fractional-order stochastic 2D integral fields from convolutions	21

2.2.1. Discrete domain fractional-order spatio-stochastic integration	21
2.2.2. Fractionally integrated fields from doubly indexed Gegenbauer polynomials	29
2.3. Spatial Gegenbauer fields: proof of proposition 2.2	35
Chapter 3. Stochastic Continuous Domain Convolutional Integration Models	39
3.1. Continuous spatial domain fractional-order integration models	39
3.1.1. Generalized fractional Brownian fields (GFBBF)	40
3.1.2. On convolution of MFBBF (to GFBBF)	43
3.2. On convolutions of modulated fractional Brownian motions	48
3.2.1. Context	48
3.2.2. PSD association with FBMM $\mathbf{X}_{\mathcal{H}_k, u_k}$ via that of \mathbf{Y}_k	50
3.2.3. Convolution between FBMM $\mathbf{X}_{\mathcal{H}_1, u_1}$, $\mathbf{X}_{\mathcal{H}_2, u_2}$ via characterization of $\mathbf{Y}_1 \star \mathbf{Y}_2$	53
Chapter 4. On Machine Learning of Very Long-Range Spatial Dependence Structures	55
4.1. PSD-based learning for multi-fractional interaction identification	57
4.1.1. Multi-fractional interaction identification problem	57
4.1.2. State-of-the-art: direct and Fourier-based transfer learning of multi-fractional interaction features	57
4.2. Multi-fractional interaction identification from PSD pole counting	59
4.2.1. GFBBF PSD poles determine the identification problem	59
4.2.2. Stochastic interaction learning constrained to PSD feature extraction	61
4.3. Conclusion	65
