Preface	ix
Chapter 1. Flows, Lie Derivative, Inner Product and Cartan Formula	1
1.1. One-parameter group of diffeomorphisms or flow	1
1.2. First-order differential operator	4
1.3. Lie derivative	5
1.4. Inner product	6
1.5. Various properties	7
1.6. Exercises	14
Chapter 2. Poincaré Lemma or Volterra Theorem	17
2.1. Preliminaries	17
2.2. Poincaré lemma, Volterra theorem	18
2.3. Some properties	23
2.4. Exercises	25
Chapter 3. Some Generalities on Sheaf Cohomology	33
3.1. Presheaves and sheaves	33
3.2. Čech cohomology	36
3.3. More definitions and basic properties	38
3.3.1. Various definitions and examples	38
3.3.2. Leray theorem	45
3.4. Exercises	47

Chapter 4. Čech–De Rham–Dolbeault Cohomologies and Poincaré Lemma	53
4.1. De Rham cohomology	53
4.2. Mayer–Vietoris sequence and the Rham cohomology of the n -sphere	61
4.3. Künneth formula and the cohomology group of the n -dimensional torus	68
4.4. Some remarks	71
4.5. Dolbeault cohomology: $\bar{\partial}$ -Poincaré lemma (or Dolbeault–Grothendieck lemma)	72
4.5.1. Preliminary	72
4.5.2. Generalized Cauchy integral formula	75
4.5.3. $\bar{\partial}$ -Poincaré lemma in one variable	77
4.5.4. $\bar{\partial}$ -Poincaré lemma or Grothendieck–Poincaré lemma	79
4.5.5. Isomorphism between Dolbeault and Čech cohomology: Dolbeault theorem	82
4.5.6. A special case of the Leray theorem	84
4.6. Connections, curvature and first Chern class of line bundles	86
4.7. Exercises	92
References	99
