# Contents

**Preface** . . . . . ix

**List of Symbols** . . . . . xiii

**A** . . . . . 1

ABSUM method (sum of absolute values of maximum modal responses) . . . . . 1
Acceleration impedance . . . . . 2
Accelerometer . . . . . 2
Accumulation of damages . . . . . 6
Admittance . . . . . 8
Advanced response combination . . . . . 8
Algebraic sum of the maximum responses . . . . . 10
Aliasing . . . . . 11
Amplification factor . . . . . 11
Amplitude spectral density . . . . . 16
Apparent mass . . . . . 16
Apparent stiffness . . . . . 16
AR method . . . . . 16
ARMA method . . . . . 16
Autocorrelation function . . . . . 16
Autocorrelation function of band-limited white noise . . . . . 20
Autocovariance . . . . . 23
Autoregressive (AR) methods . . . . . 23
Autoregressive moving average (ARMA) . . . . . 28
Auto-stationarity . . . . . 30

Average of largest peaks . . . 30
Average number of maxima per second . . . 31
Average number of zero crossings with a positive slope . . . 32
Averaging . . . 32

**B** . . . 37

b parameter . . . 37
Band-stop filter . . . 41
Band-limited white noise . . . 41
Bartlett method . . . 41
Basquin relationship . . . 47
Beat . . . 48
Bessel function . . . 50
Bias . . . 51
Bingham . . . 54
Blackman–Tukey method . . . 54
Bolt loosening under vibration . . . 59
Bootstrapping . . . 63
Broadband noise . . . 65
Bump test . . . 65
Burg's algorithm . . . 66
Butterworth filter . . . 67

**C** . . . 69

Certification . . . 69
Certification test . . . 69
Characterization test . . . 69
Chi-square distribution . . . 69
Choice of transfer function . . . 75
Clearance factor . . . 75
Clough method (modal combination) . . . 75
Coefficient of variation of fatigue damage . . . 75
Coherence function . . . 82
Coherent gain . . . 85
Coherent power gain . . . 85
Colors of noise . . . 86
Combination of spatial components . . . 87
Comparison . . . 87
Compliance . . . 88
Concatenation . . . 89

Confidence interval (PSD) . . . 89
Consistency . . . 99
Continuous-time Fourier series . . . 99
Continuous-time Fourier transform (CTFT) . . . 99
Convolution of two functions (or convolution product) . . . 99
Correlation . . . 100
Correlation duration . . . 102
Correlogram . . . 107
Corten Dolan's accumulation law . . . 108
Coulomb damping . . . 108
Counting methods . . . 108
Covariance . . . 108
Covariance method . . . 109
CQC method . . . 111
CQC3 rule . . . 115
CQC4 . . . 117
Crest factor . . . 117
Critical damping . . . 118
Cross-correlation function . . . 118
Cross-power spectral density . . . 119
Cutoff frequency . . . 122

**D** . . . 123

Damped free response . . . 123
Damping . . . 125
Damping ratio (or damping factor) . . . 128
Daniell method . . . 128
Decade . . . 134
Decaying sinusoidal pulse . . . 134
Decibel . . . 135
Decimation . . . 138
Degree of freedom . . . 138
Der Kiureghian's method . . . 139
Digitizing the signal . . . 141
Dirac delta function . . . 142
Dirlik's probability density . . . 142
Distribution function of rainflow half-ranges . . . 144
Differences between the probability of peaks and of ranges . . . 145
Discrete Fourier transform . . . 145
Discrete-time Fourier series (DTFS) . . . 146
Discrete-time Fourier transform (DTFT) . . . 148

Displacement power spectral density . . . . . 148
Distribution law of the coefficient of variation. . . . . 149
Double sum combination (DSC) . . . . . 149
Dry friction. . . . . 156
Duhamel's integral . . . . . 158
Dynamic modulus. . . . . 160
Dynamic range . . . . . 160

**E** . . . . . 163

Electrodynamic exciters . . . . . 163
Endurance ratio . . . . . 167
Energy spectrum . . . . . 167
Ensemble averages (through the process). . . . . 168
Equivalent bandwidth . . . . . 170
Equivalent noise bandwidth. . . . . 170
Equivalent noise bandwidth of a window. . . . . 171
Equivalent viscous damping . . . . . 173
Ergodicity . . . . . 177
Error function . . . . . 180
Estimator . . . . . 189
Euler's constant . . . . . 189
Evaluation test. . . . . 190
Event . . . . . 190
Exaggeration factor. . . . . 190
Excess kurtosis . . . . . 190
Extreme response spectrum . . . . . 190
ERS and fatigue damage spectrum of an acoustic noise . . . . . 200

**References** . . . . . 213

**Index** . . . . . 235
